Executive Summary

Transaction Overview

- Intersnack Group to acquire 100% of Utz class A Common Stock for **\$14.25** per share in an all cash-transaction
- Offer represents a **~91%** premium to Utz's unaffected closing price on July 20, 2026
- Rice and Lissette Family Entities to roll equity and retain a **50%** stake in the combined private company alongside Intersnack **50%**

Deal Structure

- Financing sources:** ~\$920M cash from Intersnack, funded by a new \$1.1B term loan and \$250M ABL revolving facility
- Pro forma leverage:** ~4.3x–4.9x net debt/EBITDA at close
- Break-up fee:** \$50M if Utz walks away
- Deal type:** Simple Merger. Utz will become a subsidiary of Intersnack

Total Transaction Value
\$2.9 Billion

Percent Ownership
50%

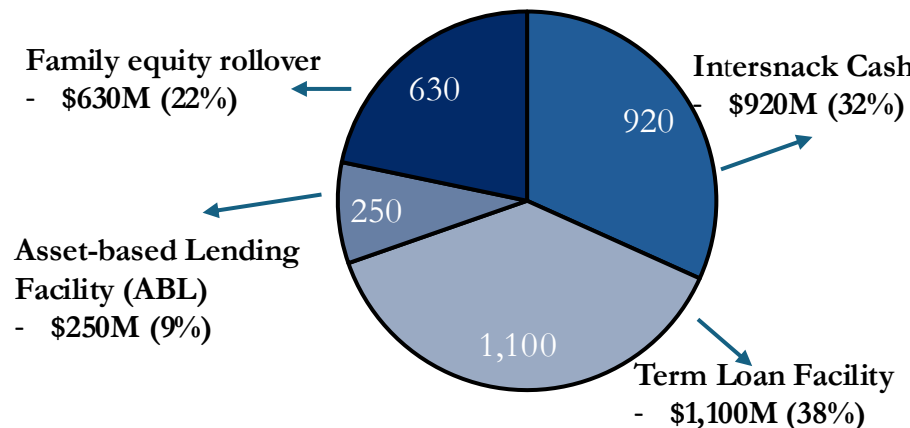

Strategic Overview

Why Intersnack is buying:

- Gets first-ever U.S. presence
- Utz is already #3 in U.S. salty snacks (**~4.4% category share**)
- Instant access to **~2,500 direct-store-delivery routes** and domestic manufacturing (hard/slow to build from scratch)
- Fits Intersnack's playbook of acquiring and scaling regional brands

Why UTZ is selling:

- The stock had been underperforming due to rising fears about snack demand, and geopolitical tensions added market fear
- Volume was declining even as pricing kept rising (running out of growth levers)
- Deal delivers immediate value (91% premium)
- Gains access to Intersnack's manufacturing, tech, and innovation resources

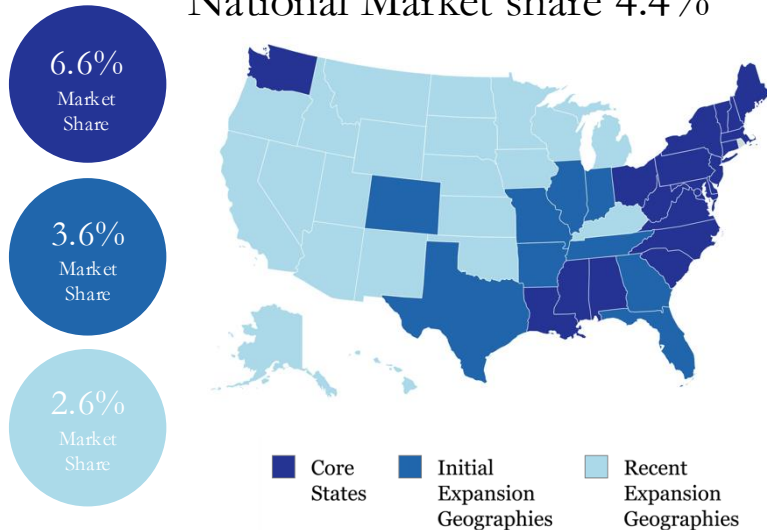

Company Overview - UTZ

Business Highlights

- **Founded 1921:** Hanover, PA | Top 4 U.S. Branded salty snack platform
- **DSD: 2,500 delivery routes** allowing Utz to stock the shelf directly. Controls space, keeps product fresh, and hard to replicate
- **Brands: 16 brands, 4 core** ones that are crucial. Utz splits its portfolio into four "Power Four" brands and a set of smaller targeted brands
- **Direction:** Transitioning to a **"better-for-you"** market and trying to expand westward – specifically California

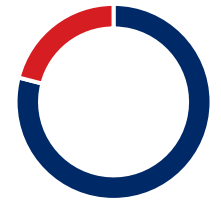

National Market share 4.4%

Company Overview - Intersnack

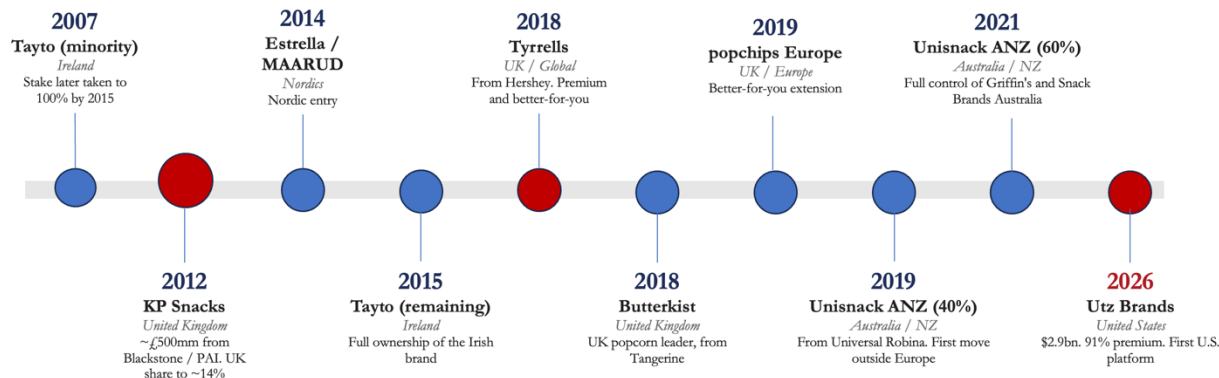

Business Highlights

- **Founded 1968:** Düsseldorf, Germany | **Europe's #2 savory snack maker**
- **Scale:** €4.5B sales (2025) | 14,500 employees | 31 countries
- **Ownership:** Private, family-held via Pfeifer & Langen | **No public shareholders**
- **Brands:** 30+ local and international, Including: KP Snacks, Tyrrells, Chio, Hula Hoops, etc.
- **Strategy:** Buy local #1 and #2 brands and **keep them local**, stay in areas where those brands are known and loved
- **Growth:** Currently only in Europe, UTZ will be their first step in trying to **break into U.S. markets**

Brand Portfolio

Timeline of Last 10 M&A Deals by Intersnack

Acquisition Playbook

- **Local stays local:** Buy local brands in different countries, **never change branding**
- **New markets:** Every deal opens a new geographic area they weren't in before. KP took UK share from **0% to ~14%**
- **Savory snacks only:** Ten deals, none of them outside the category
- **Growth by deals, not by volume:** Revenue +9.2% a year since 2018 vs. volume +2.8%. In a flat category, **growth comes from acquisitions and price**

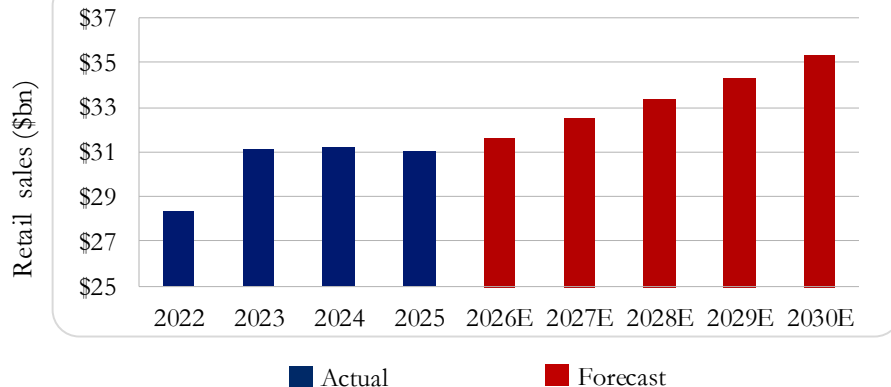

Industry Overview

Market Growth/Direction

- U.S salty snacks are worth **\$31.6 billion in 2026** and are on track to hit over **\$35 billion by 2030**
- U.S snack industry is currently growing at a steady compound annual growth rate of **~3%**. This rate is holding steady even with inflation.
- Chips make **up 46.5% of the U.S salty snack** while nuts and seeds are growing the fastest

U.S. Salty Snack Market Revenue Growth and Projection

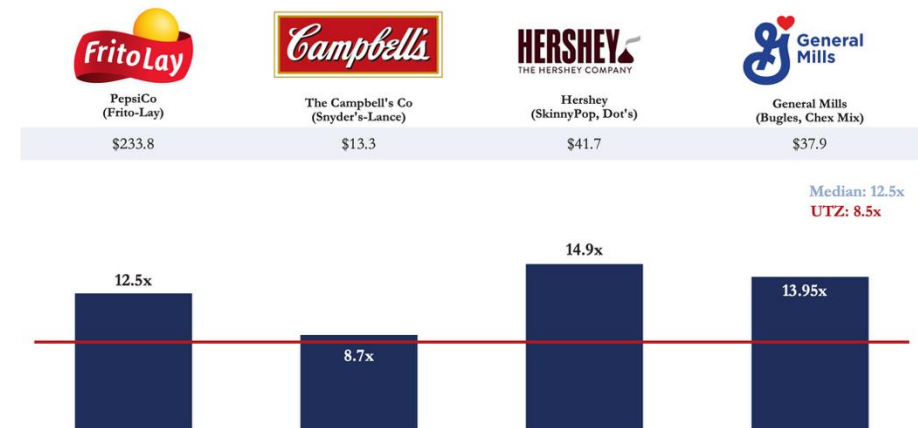

GLP-1 Impact

- Households where someone is on a GLP-1 drug are spending about **10% less on savory snacks**
- GLP-1 have become mainstream fast, with 1 in 8 adults in the U.S are already on one
- Users are eating **65% more protein** and buying way more health-focused snacks

Premiumization/ Consumer Behavior

- Seed oil-free chips are growing (**26% in unit sales** over past year)
- Traditional fats like avocado oil, olive oil, and beef tallow are now being used as marketing features
- Companies aloud to charge more for premium products and consumers are willing to pay the price
- Snack purchases are impulse buys made at the shelf, packaging and brand recognition is the selling

Football Field

IBP UTZ

Risks and Mitigation

Risk

Description

Mitigation

Competitive Intensity
and Private Label
Growth

Utz competes against large players like Frito-Lay and cheaper private-label snacks, affecting prices and shelf space. They also rely on big retailers who could drop products for cheaper brands

Power brands enable strong regional identity and customer loyalty. Expansion into new markets and channels decreases dependence on a single retailer, and DSD prevents others from taking shelf space

High Leverage and
Debt Service

Utz carries ~856M gross debt, with net leverage stood at 3.4x EBITDA FY 2025

Management is guiding net leverage towards ~3.0x. Capex is also decreasing, which is freeing cash flow for deleveraging

Shared ownership
between Intersnack and
the Rice/Lissette Family

Intersnack and the family each hold a 50% stake post close, meaning no party has full control. This can slow decision-making, create risk on major strategic decisions, and limit how much Intersnack can integrate

The merger agreement can be structured to define decision rights and prevent deadlock, and continued family participation can benefit brand name and retailer relationships

Inflating Commodity
and Input Costs

Rising costs for potatoes, cooking oil, packing, labor, and freight all decrease margins

Utz has cut its own costs through plant consolidation and automation, while raising prices carefully to offset inflation without losing customers

Merger Thoughts

Strategic Vision

Intersnack which is Europe's largest branded snack manufacturer, gains an established U.S. manufacturing and distribution platform through Utz, accelerating its international growth strategy

Category, Innovation, and Cost Synergies

Utz's scale in pretzels, kettle chips, and cheese snacks complements Intersnack's savory snacking expertise, expanding R&D depth. Combining plants, purchasing, freight, and warehouse networks can cut costs and improve factory utilization. However, merging Utz's DSD model with Intersnack's different approach will take time

Best Deal for Utz

Utz's stock had underperformed since going public in 2020. Intersnack is paying \$14.25 per share in cash (~91% premium) valuing the company at \$2.9 billion. Shareholders get immediate cash and there's no financing risk.

Category Headwinds

U.S. snack volume growth has slowed as shoppers cut back and trade down to cheaper brands. Cuts to SNAP benefits have also hit sales, since many lower-income shoppers rely on that money for groceries and snacks.
